pdfToolbox Portal

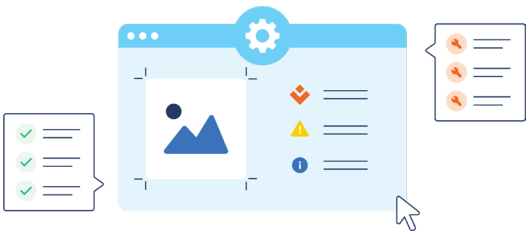

Embeddable PDF technology

callas software provides easily integrateable PDF technology that slots into your solutions seamlessly, so you can use your own user interface. But what if **you want to jumpstart development with ready-made UI**? As a client-server solution driven through any web-browser, that is exactly what pdfToolbox Portal provides. A customizable job management platform that already embeds the core PDF technology. All you have to do is supply it to your customers.

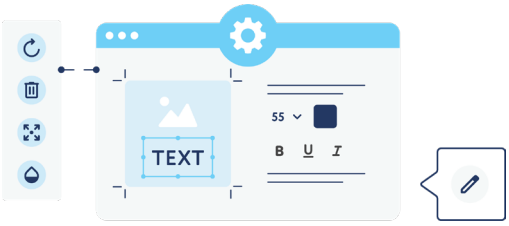

Order handling

An intuitive order handling interface that allows full automation, yet keeps overview and allows manual intervention.

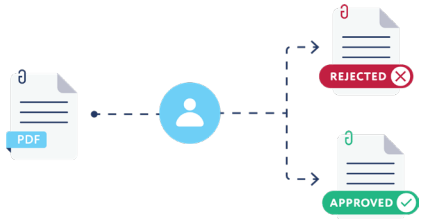

Quality control

Automatically check all PDF files coming into the portal. And yes, of course fixing is supported as well.

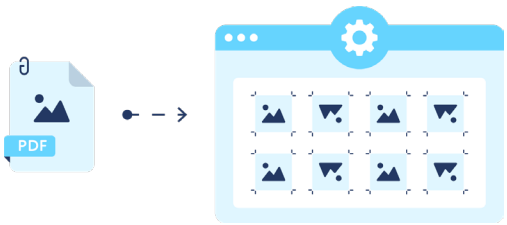

Manual PDF editing

Those PDF files that cannot be fixed automatically? Use the integrated PDF editor to perform manual clean-up.

Online approval

Need verification that the PDF is perfect for the customer? The integrated online approval platform does just that.

Imposition and nesting

Imposing single jobs or ganging multiple jobs together in a step-and-repeat or closely nested layout, you said? All supported!

Output

Drop production-ready PDF files into specific folders, to be picked up by the output device.

Visit the callas OEM website

The core pdfToolbox technology used by pdfToolbox Portal, can be licensed separately as an OEM as well

callas

Integrate pdfToolbox Portal

Predefined but customizable, that is the best way to describe pdfToolbox Portal. Everything can be **used out-of-the-box so you get going super quickly**. But if you want to **customize things**, we've got your back. A full API allows integration into the rest of your workflow if necessary.

Predefined UI

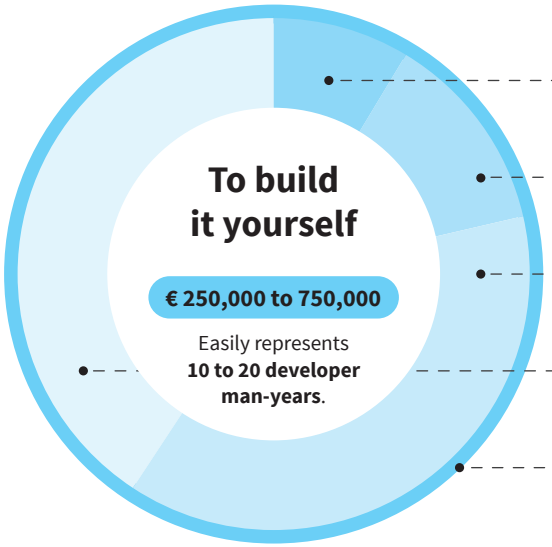

Intuitive user interface, optimized to print PDF files as quickly as possible.

Whitelabel

Use your own logo, name, and color scheme, so pdfToolbox Portal fits right into your world.

Permissions

Fine-tune available functionality to fit your budget and your customers' needs.

1. **Low-level PDF support** (1 to 2 man-years)
2. **PDF quality control** (1 to 3 man-years)
3. **PDF fixing and production optimization** (5 to 10 man-years)
4. **Streamlined UI and user experience** (3 to 6 man-years)
5. **Ongoing product management, support…** (Priceless)

> **"Developing your own PDF-based technology is expensive and time consuming. We have 30 years of experience to help you with that."**
