pdfToolbox

PDF processing **Quality control**

callas pdfToolbox offers powerful and flexible PDF processing that integrates seamlessly into your sofware. Whether you need **quality control, fully automated PDF correction,** or **complex rendering**, pdfToolbox provides a best-in-class engine that handles it all. Built for maximum adaptability, it can be integrated via hot folders, command-line, SDK, or ReST API, running reliably on all major operating systems.

Conversions from and to PDF

Convert images and Office files to PDF in a snap. Need the other way around? Output PDFs as images or as rendered, image-based PDFs.

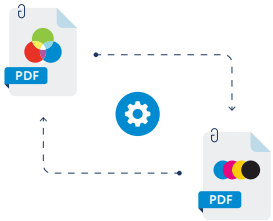

Customizable quality control

Ensure quality every time with customizable preflight profiles that support ISO and industry standards such as PDF/X, PDF/VT, and PDF/A.

Feedback from PDF analysis

Generate preflight reports as human-readable PDFs or machine-readable XML/JSON in one go — fully customizable and multilingual.

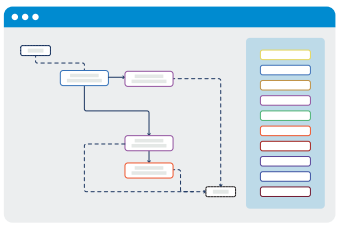

Color management

Handle color with confidence — insert output intents, convert color spaces, apply DeviceLink profiles, and manage spot colors with ease.

Decorating PDF files

Make PDFs print-ready using various built-in technologies that let you add production elements such as marks, barcodes, and dielines.

Conditional processing

Process Plans enable automated, conditional processing by connecting different technologies like preflight checks, corrections, JavaScript calculations, and more.

callas

Integrate pdfToolbox

The callas pdfToolbox technology is powerful, and very flexible in how it can be integrated in a solution.

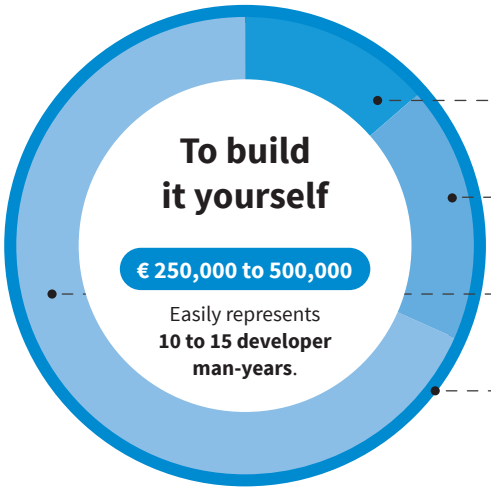

Desktop
Manual inspection and fixing, with preparation of profiles for automation

Server
Hotfolder automation processes PDF files into success or error folders

CLI
Direct command-line integration, ideal for scripting environments

SDK
Software development kit for integration using programming libraries

API
REST API for accessing pdfToolbox technology as a SaaS solution

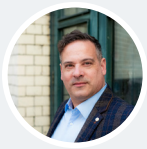

1. **Low-level PDF support** (1 to 2 man-years)
2. **PDF quality control** (1 to 3 man-years)
3. **PDF fixing and production optimization** (5 to 10 man-years)
4. **Ongoing product management, support…** (Priceless)

Supported platforms

macOS, Windows, Linux, Docker, Cloud

> **“Developing your own PDF-based technology is expensive and time consuming. We have 30 years of experience to help you with that.”**
